

Halaxy Clinical Notes

Patient: John Smith

12/03/2026 - Intake

John described difficulty settling after a recent change at work.

We mapped a short evening routine and agreed to review it next session.

12 March 2026 - Review

John reported that the evening routine helped on three nights.

He noticed the strongest effect when the phone was left outside the bedroom.

The plan was continued with a small adjustment to the reminder time.

The review continued after this page break.

We also identified a practical barrier: late public transport made the routine harder.

18/03/2026 - Follow-up

John chose to prepare the reminder before leaving work and will bring his notes.
